Satellite Building Project

Industry Engagement Sessions

- To better prepare you for a career in the space industry, Space Faculty will arrange engagement sessions with industry experts for workshop participants
 - Interact and learn from the experts
 - Understand more about the space industry
- Look out for your emails!

Satellite Building Project

- Mission: In-Orbit sensing for in-space situation awareness (SSA)
- Platform: 3U CubeSat

• Schedule:

Date	Event
Aug 2026 to Jul 2027	Design and development of CubeSat, including various technical review meetings
Aug 2027	Shipping of CubeSat for integration with deployer
Oct 2027 to Nov 2027	Launch and Early Orbit Phase (LEOP)
Nov 2027 to May 2028	Operation Phase

Methods to Join the Project

Methods	Duration / Time Commitment	Involvement
One year Internship*	One year / full-time	Follow through entire duration of satellite development
Internship*	One semester or trimester or holiday period / full-time	Involvement to be determined by Space Faculty
Final year / Capstone Project	One year / part-time	Follow through entire duration of satellite development. Scope determined with university
Project Module	One semester or trimester / part-time	Defined sub-system / module project with university
Self-interest	Part-time	Depends

* Internships will be very limited

Satellite Building Project

- After selection, participants will be grouped into teams to work on a sub-system or module
- For those who can commit for at least one year, they might be chosen as system engineers or project manager
- Contribute towards the satellite design, development, integration, testing and operation
- Attend technical review meetings
- Do more, learn more!

Satellite Building Project

- If you are interested, write an email to us:
 - **Address:** nelson.tan@spacefaculty.asia
 - **Subject:** “Application for Satellite Building Project”
 - Treat it like a job application and send us your resume!
 - What are your skills or strengths?
 - What would you like to work on? How do you think that you can contribute to the project team?
 - How are you intending to join the project? How much time can you commit to the project (for the different phases)?
- Do so before end of May!
